Hello children of Ol Moti Primary School!

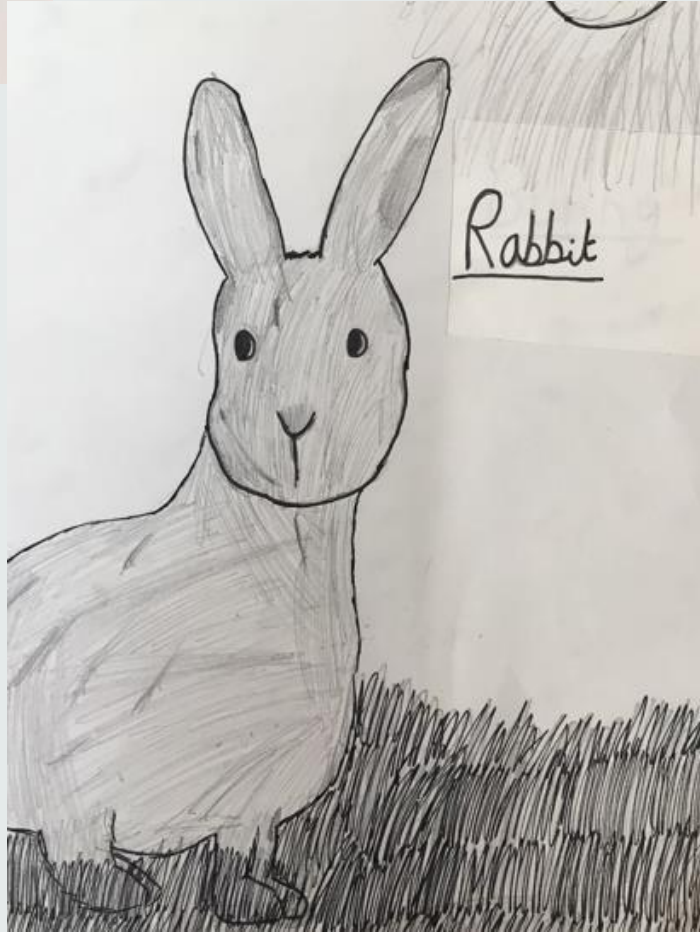

It has been so lovely to share learning with you this year. We loved your letters, your amazing song and video, and your fantastic drawings of your local wildlife – thank you!

Here are some drawings that children of The Discovery School have created for you. We hope you like them!

CHINDI

Fact:
The squirrel native
to the UK is the
red squirrel but
the grey squirrel is
native to America. The
Red squirrel was nearly
been wiped out by
the grey squirrel
though.

RED
FOX

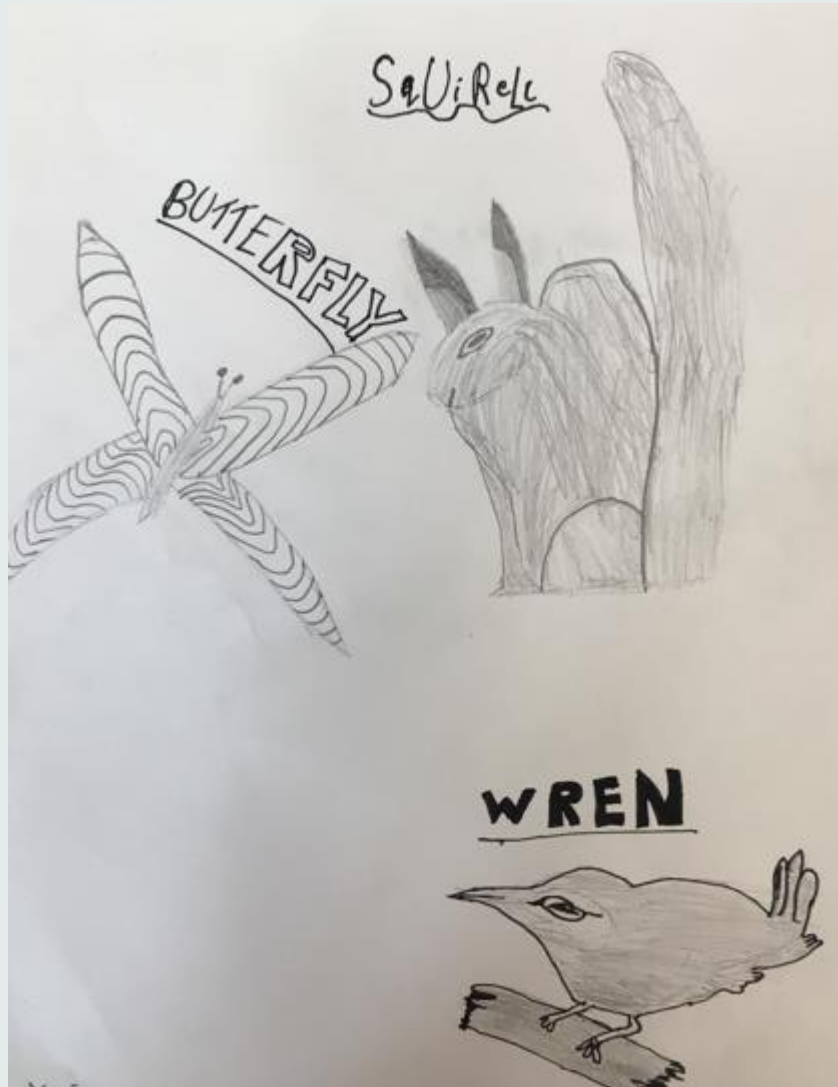

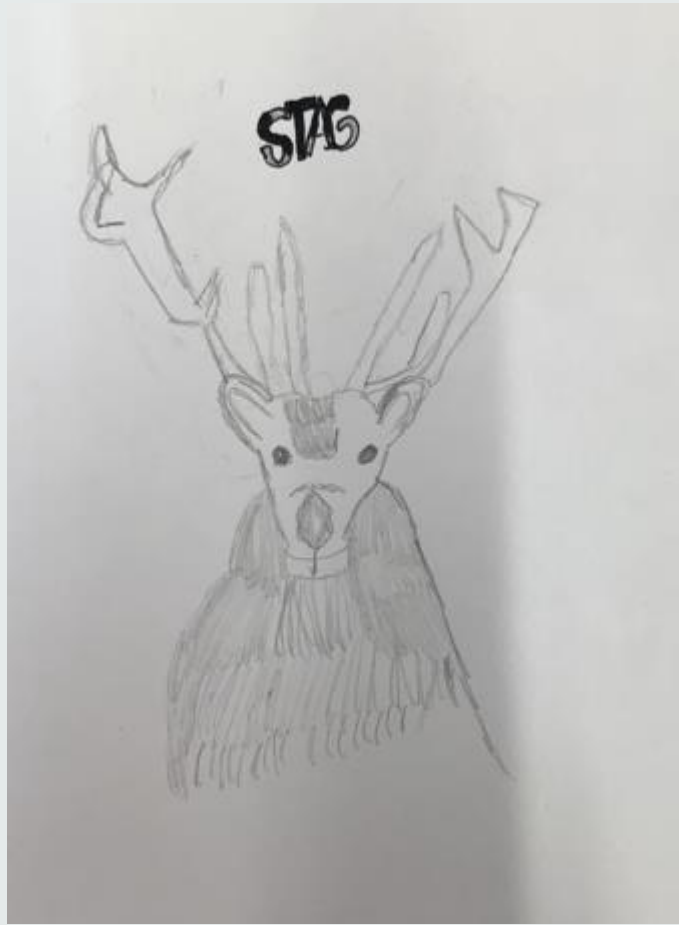

badger

owl

Pointy ears

antlers

hooves

Did you know deers eat Grass, ⁱⁿ bushes, leaves, trees and other woody plants. Also eat Fruit and berries.

Did you know that some deers don't always have big antlers because deers use their antlers to protect themselves and to catch their food. Their antlers grow back in about a month.

Ladybirds

Ladybirds play dead to protect themselves.

Ladybirds eat Fungus, water, sweet sooty raisins, leaves and Aphids.

Many eat 5,000 aphids (insects that suck juices out of plants) during its life.

Ladybirds are not poisonous but they are toxic to some animals.

They come in many colours not just red.

BORN FREE

Badger

The red fox is the
most common
fox!

They can be good
parents to their
pups!

They are
really fast!

Foxes are related
to dogs!

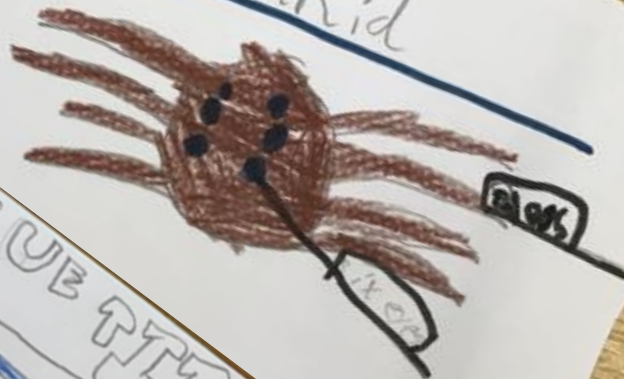

Foxes are really friendly
as they can
be kept as a pet!

We hope you liked our pictures.

We have learnt so much about the wildlife in your local environment.

Hopefully, you will be able to learn about our local plants and animals from our drawings too!

We are looking forward to sharing learning again with you next year.
